Venoxa AI

DESIGN SPECIFICATION

The new landing page

A long, scroll-driven page that puts the level test first, then walks a new learner through every part of the app. LanGeek's structure, Venoxa's colors, with a proper blue.

13 sections | Dark and light | English and Arabic (RTL) | Responsive

November 2026 · Prepared for Abdelghani

FOUNDATION

Design system: your colors, plus a proper blue

Base
#0A0A0E · page

Surface
#0F0F13 · cards

Input
#21212A

Navy
#0B1530 · header

Blue (new)
#0A78D6 / #1E90F0

Orange
#FF5722 · kept

Purple
#673AB7 · kept

Highlight
#FFEB3B · kept

Text
#FFFFFF

Muted
#B9BDC9

Primary · Blue | Secondary · Ghost | Premium · Orange | Chip | Active chip

★

Card

28px radius, 1px hairline border, lifts 6px with a blue glow on hover.

Progress

Blue = progress, links, active states

Orange = Premium, streaks, highlights

COLOR ROLES

- **Blue** is the action color: main buttons, links, active nav pill, progress.
- **Orange** is energy: Premium, streak flame, XP, small highlights.
- **Purple** is atmosphere: gradient partners and decorative glows only.
- **Yellow** is kept for hover accents and the Word of the Day.

TYPOGRAPHY

- Inter (already loaded) for Latin, Noto Sans Arabic for Arabic.
- H1 64/700 · H2 40/800 · H3 22/700 · Body 17/400 · Caption 13/500. Tight tracking on headings (-2%).

SHAPE AND DEPTH

- Radius: cards 28px, buttons pill, icon tiles 14px.
- Shadows are colored glows (blue/orange at 30-45%) instead of grey drops.
- Section rhythm: 112px vertical padding; max content width 1240px.
- Each section sits on the dark base with one faint blue or purple radial glow, so the page feels alive but stays calm.

LIGHT THEME

- White page, #F3F6FB surfaces, same blue/orange/purple. Header stays navy in both themes, as on LanGeek.

STRUCTURE

The page, top to bottom

01
Header
Utility bar and main nav
`All tabs`

02
Hero + level test
Test is the first thing seen
`level-test`

03
Learning path
5 numbered steps
`level-test to profile`

04
Topic cards
5 illustrated cards
`vocab, grammar, reading`

05
Premium banner
Upgrade moment
`pricing`

06
Smart vocabulary
Tool list + live preview
`vocab, phrasal, idioms`

07
Speaking and AI
Call mockup + 4 skills
`speaking, listening`

08
Plan and progress
Weekly plan + stats
`plan, profile`

09
Language tools
10-card grid
`tools group`

10
Community
Orbit + counters
`AuthModal`

11
Mobile + word
App and Word of the Day
`word-of-day`

12
Final CTA
Test button again
`level-test`

13
Footer
Links, legal, contact
`new pages`

NEW LEARNER (LOGGED OUT)

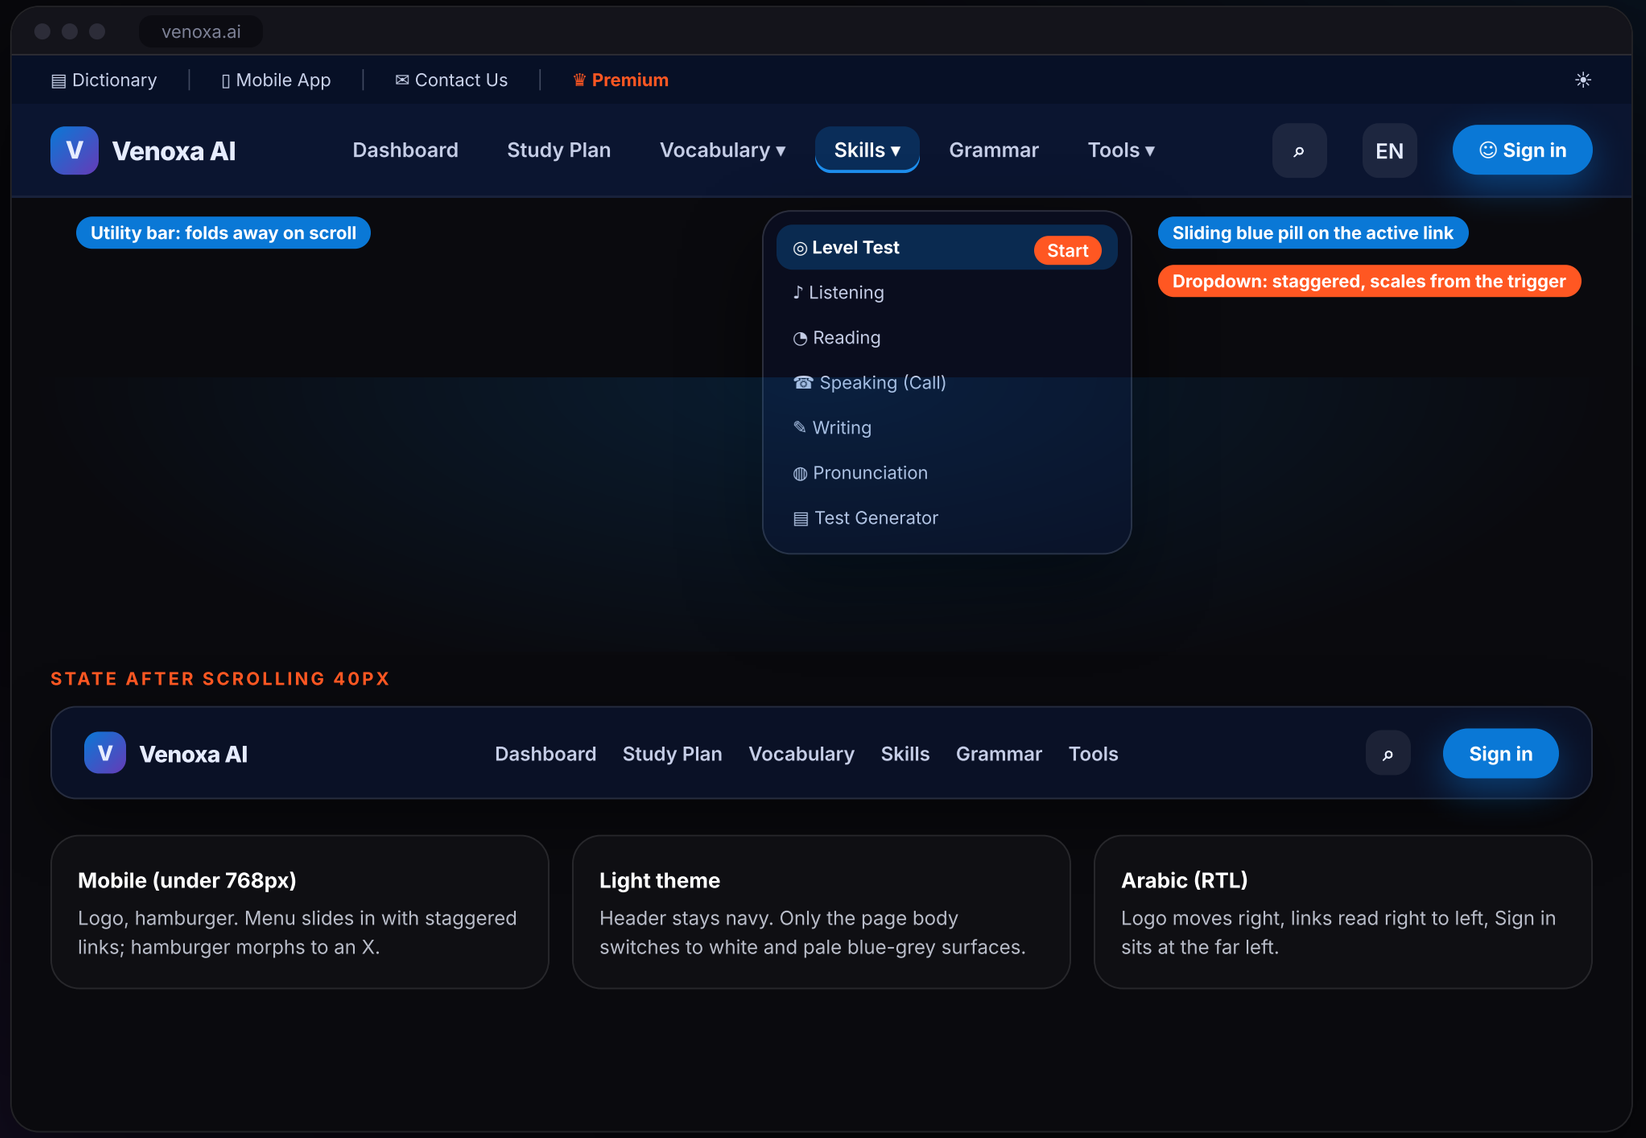

Sees this landing page. The first screen is the level test. Every section below ends with a button that sends them to that feature, and the final band repeats the test button.

RETURNING LEARNER (LOGGED IN)

Goes straight to the existing dashboard. The landing page stays reachable from the logo, and the footer appears at the bottom of the dashboard as well.

01 · HEADER

Two-tier header, like LanGeek

Mobile (under 768px)
Logo, hamburger. Menu slides in with staggered links; hamburger morphs to an X.

Light theme
Header stays navy. Only the page body switches to white and pale blue-grey surfaces.

Arabic (RTL)
Logo moves right, links read right to left, Sign in sits at the far left.

LAYOUT

- **Top utility bar** (30px, deeper navy): Dictionary, Mobile App, Contact Us, Premium in orange with a crown. Dark/light toggle at the far end.
- **Main bar** (58px, navy): logo left, links centered, search, EN/AR switch and a blue **Sign in** pill on the right.
- Links: Dashboard, Study Plan, Vocabulary, Skills, Grammar, Tools. Vocabulary, Skills and Tools open dropdowns.

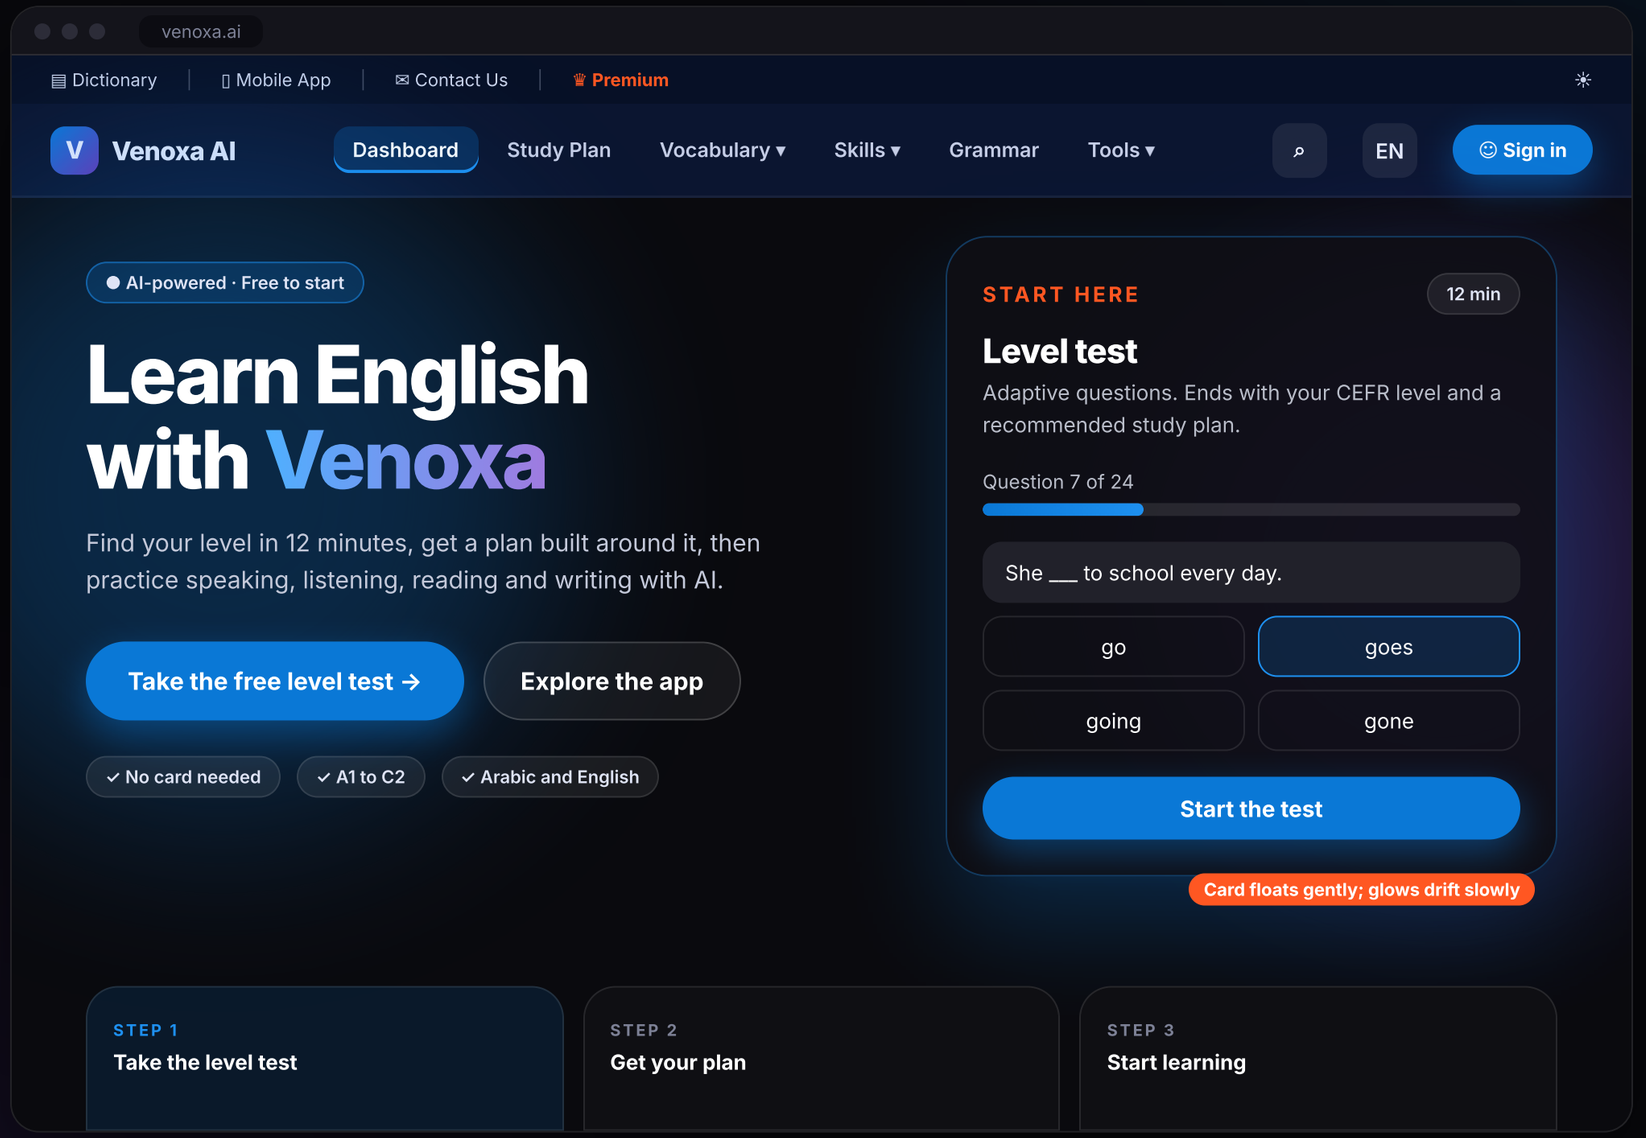

BEHAVIOR

- One blue pill glides behind the active link (shared-layout spring).
- Dropdown: scale from 0.96, items stagger at 30ms.
- After 40px of scroll the utility bar folds away and the main bar gains blur and a hairline border.
- Below 768px: hamburger morphs to an X and the menu slides in; Arabic mirrors the whole bar.

Replaces `<header className="lg-nav-wrapper">` in `App.jsx`. Keep `navItems` and `activeDropdown` logic.

02 · HERO AND LEVEL TEST

The first thing a new learner sees is the test

LAYOUT

- Two columns: headline and CTAs on the left, a live **Start here** test card on the right.
- The card shows a real sample question, so the test feels one click away. Clicking any answer starts the test.
- Soft blue and purple glows sit behind; faint particles from your existing background stay.

COPY

- H1: "Learn English with Venoxa". Subtitle states the 3-step promise: level, plan, practice.
- Primary CTA is always the test. Secondary scrolls to the next section.

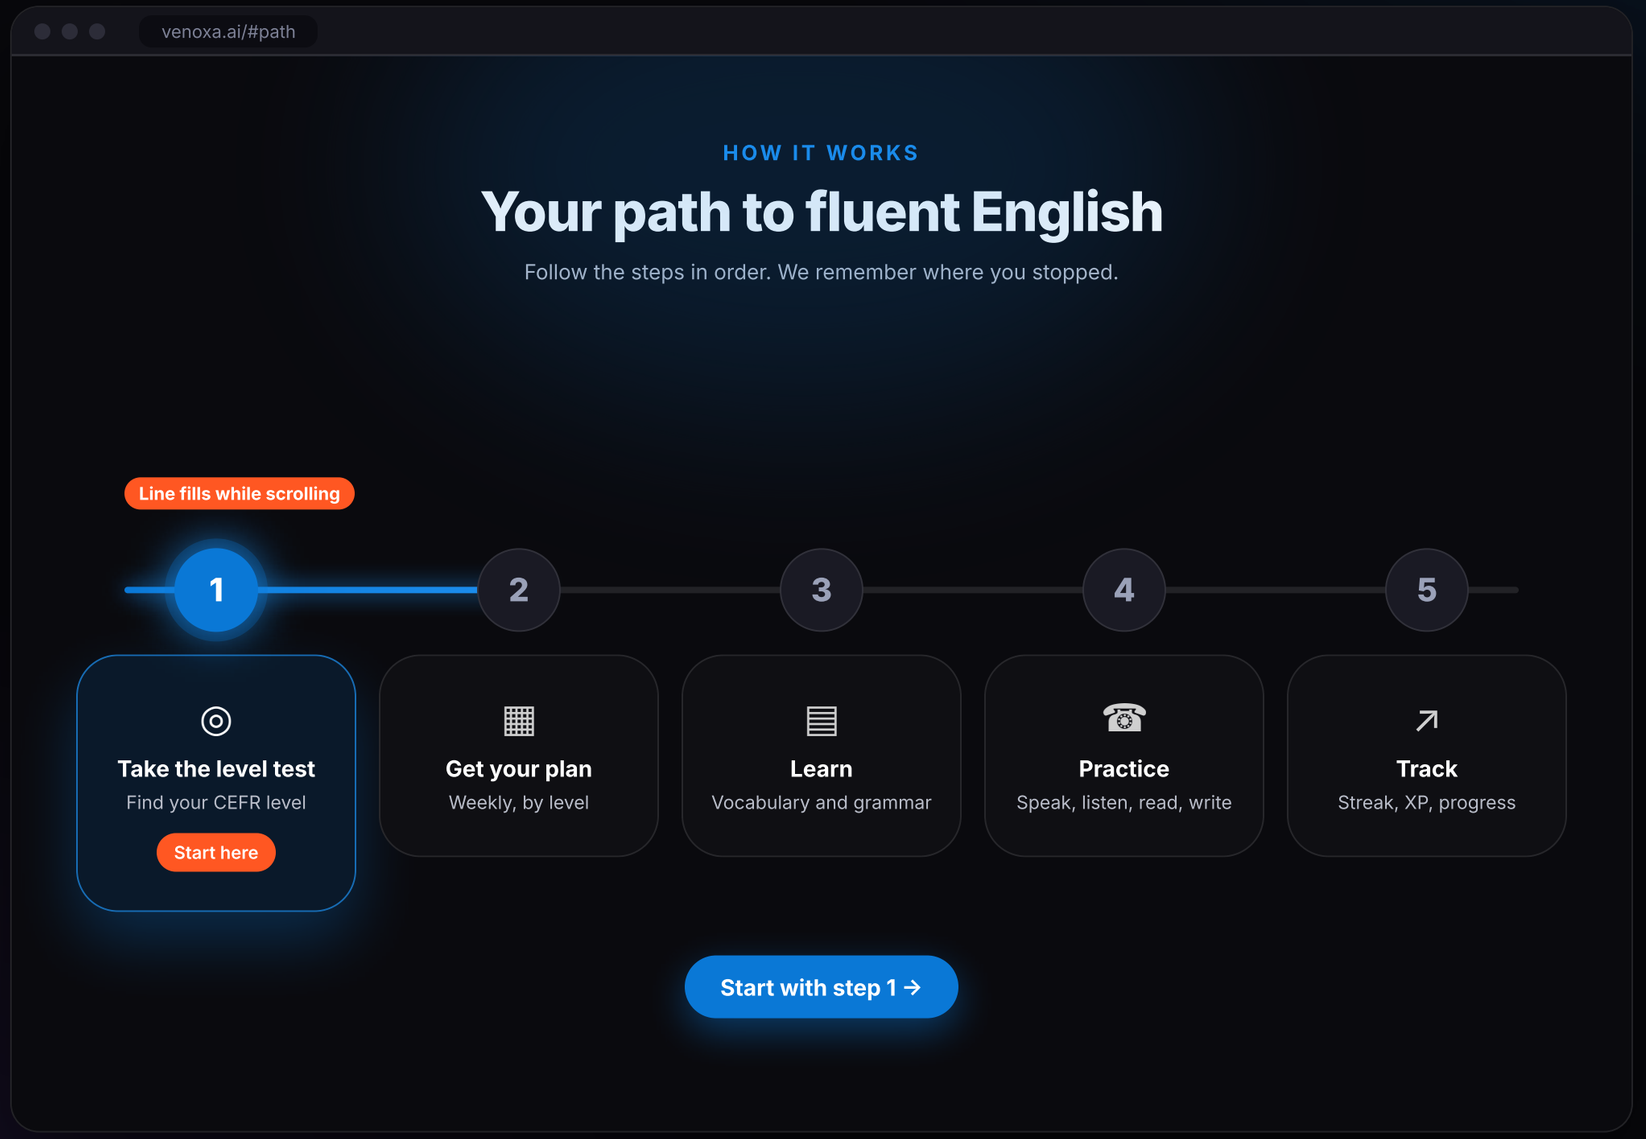

BEHAVIOR

- Headline lines rise in, then the card scales in with a spring.
- Gradient word "Venoxa" shimmers once on load.

CTA calls `setTab('level-test')`. Card reuses the existing `LevelTest` question UI.

03 · YOUR LEARNING PATH

Five steps, so nobody wonders what to do next

LAYOUT

- Five numbered step cards on a connecting line. On mobile the line becomes vertical.
- Step 1 is highlighted (blue, glowing, "Start here"). Later steps are neutral until reached.

STEPS

- **1 Take the level test** to find your CEFR level.
- **2 Get your study plan**, weekly and level-based.
- **3 Learn** vocabulary and grammar.
- **4 Practice** listening, reading, speaking, writing.
- **5 Track** streak, XP and progress.

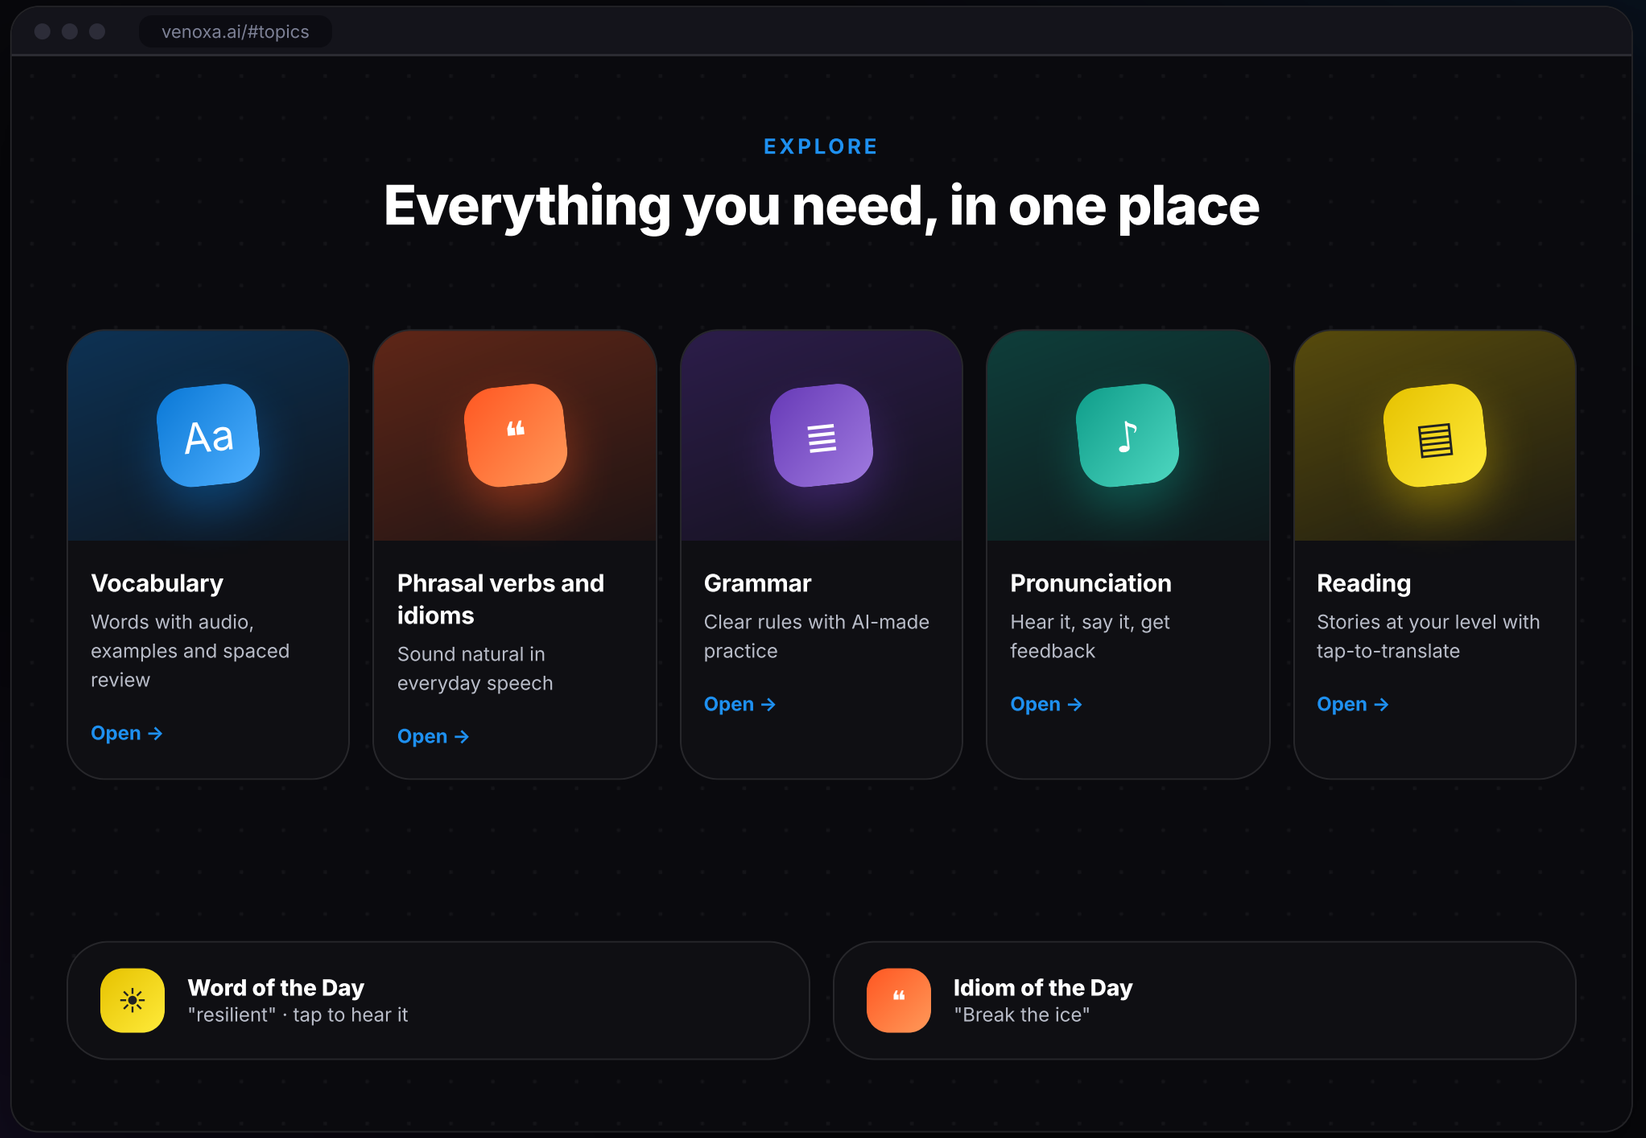

BEHAVIOR

- The blue line fills as the section scrolls into view; each number pops when the line reaches it.
- For logged-in users with progress, completed steps show a check and the line stops at their current step.

Targets: `level-test`, `plan`, `vocab` / `grammar`, `speaking`, `profile`.

04 · TOPIC CARDS

Five illustrated cards, one per core topic

LAYOUT

- Five tall cards in one row (two rows of 2 + 1 on tablet, a horizontal swipe row on mobile), over a faint dot pattern like LanGeek's.
- Each card has a tinted illustration area, title, a one-line summary and an "Open" link.
- Under the row, two thin strips surface Word of the Day and Idiom of the Day.

BEHAVIOR

- Cards stagger in from below; on hover the card lifts 6px, the illustration tilts, and the tint gets brighter.

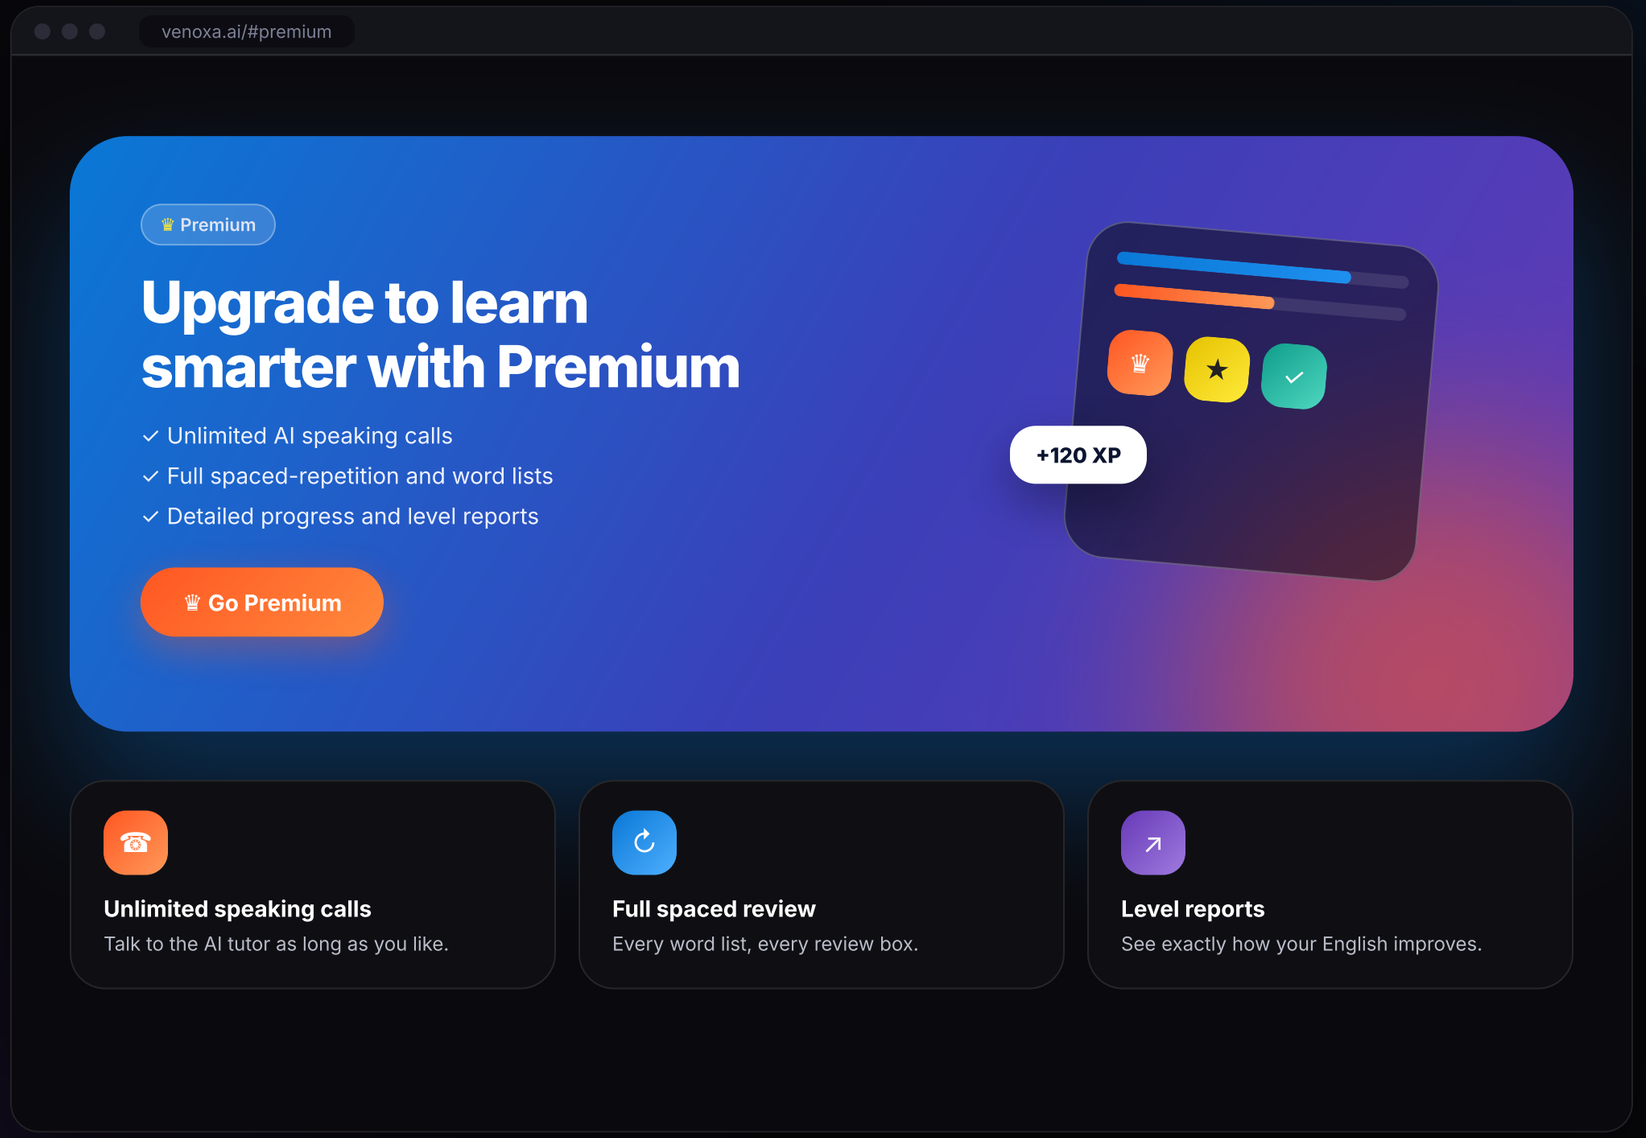

COLORS

- Each topic gets one tint (blue, orange, purple, teal, yellow) at low opacity, so the row is colorful but the page stays dark.

Targets: `vocab`, `idioms-proper`, `grammar`, `pronunciation`, `reading`, `word-of-day`, `idiom-of-day`.

05 · PREMIUM BANNER

A full-width upgrade moment, in orange and blue

LAYOUT

- One rounded 36px banner spanning the content width. Blue-to-purple gradient with an orange glow in the corner, so Premium is the only warm element in the section.
- Left: badge, headline, three benefits, orange CTA. Right: a tilted app card with progress bars and a floating "+120 XP" chip.

BEHAVIOR

- Banner scales from 0.97 and fades in; the floating chip bobs gently.
- CTA has a slow light sheen every few seconds.

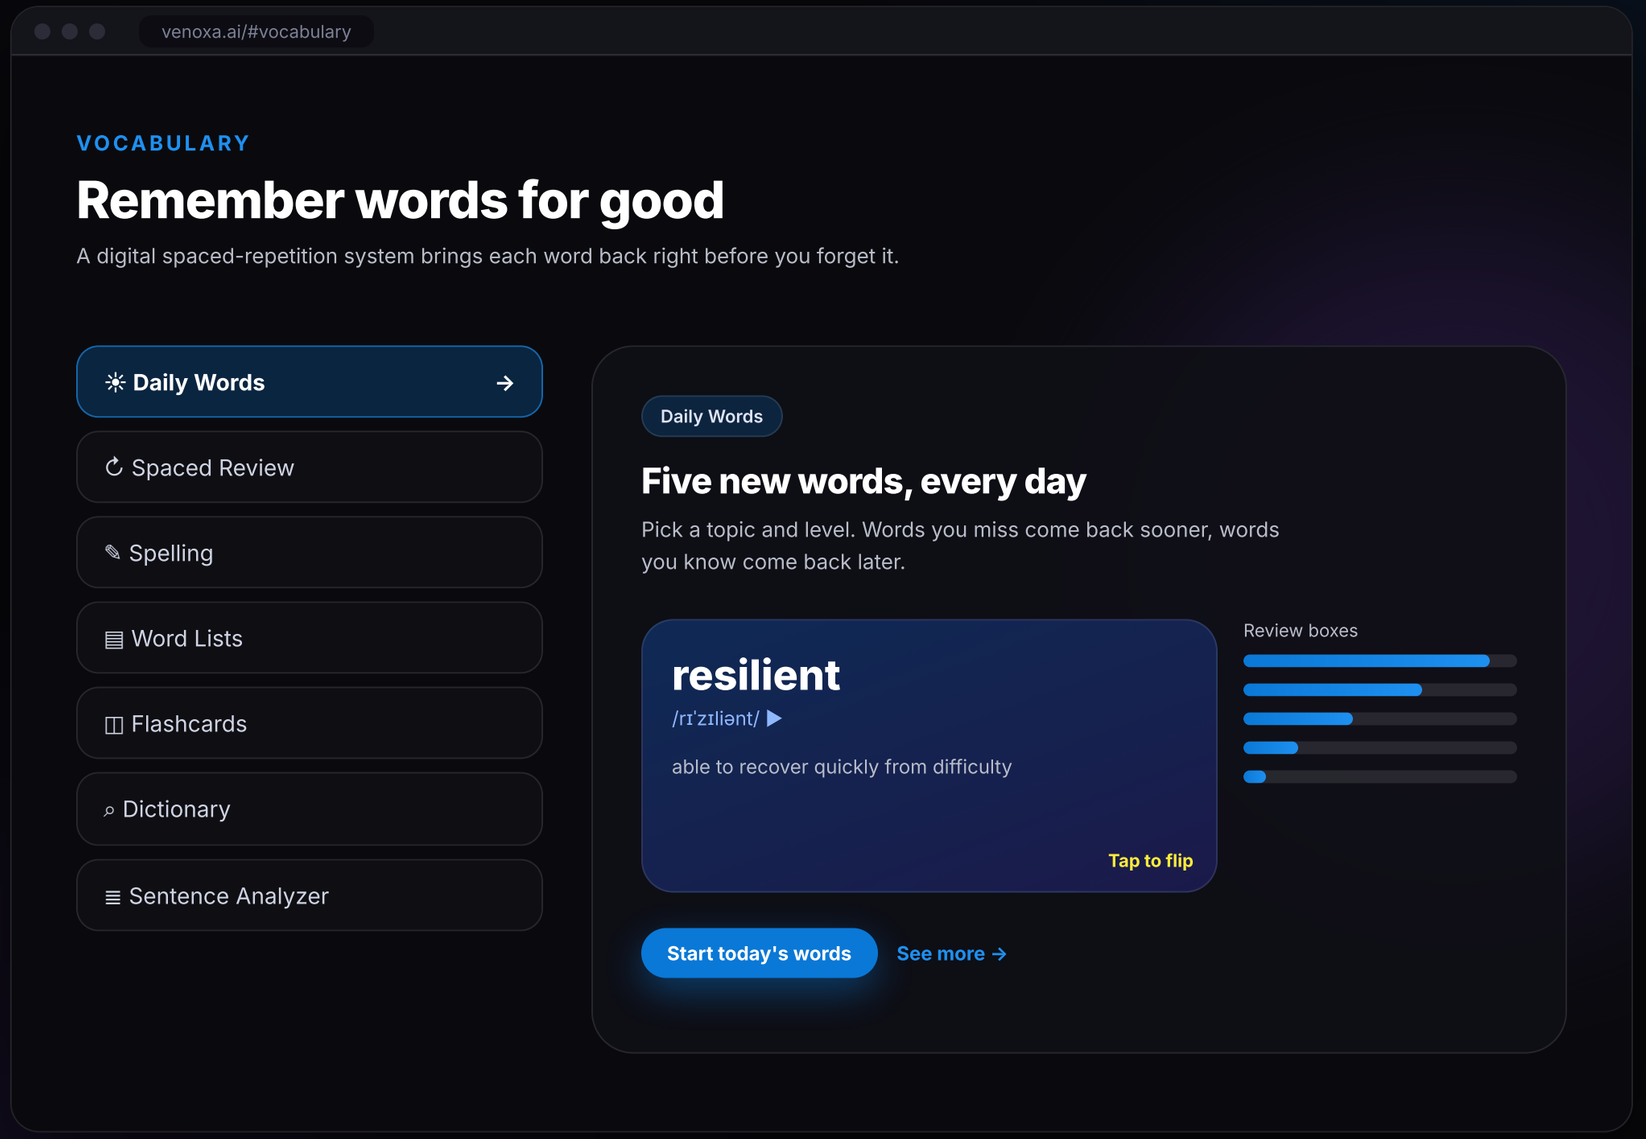

COPY

- Mirrors LanGeek's "Upgrade to learn smarter with Premium". Benefits should be edited to your real plan.

Link target: pricing/Premium page (to be created). The Premium crown in the utility bar uses the same orange.

06 · SMART VOCABULARY

Tool list on the left, live preview on the right

LAYOUT

- Left: a vertical list of the vocabulary tools. Right: one large preview card for the selected tool.
- Heading and a one-sentence explanation of spaced repetition on top.

BEHAVIOR

- Hover or click a tool: the blue selection slides to it and the preview cross-fades with a slight slide.
- The sample flashcard flips in 3D on hover; the review boxes fill to show the Leitner idea.
- Auto-advances through tools every 5 seconds until the visitor interacts.

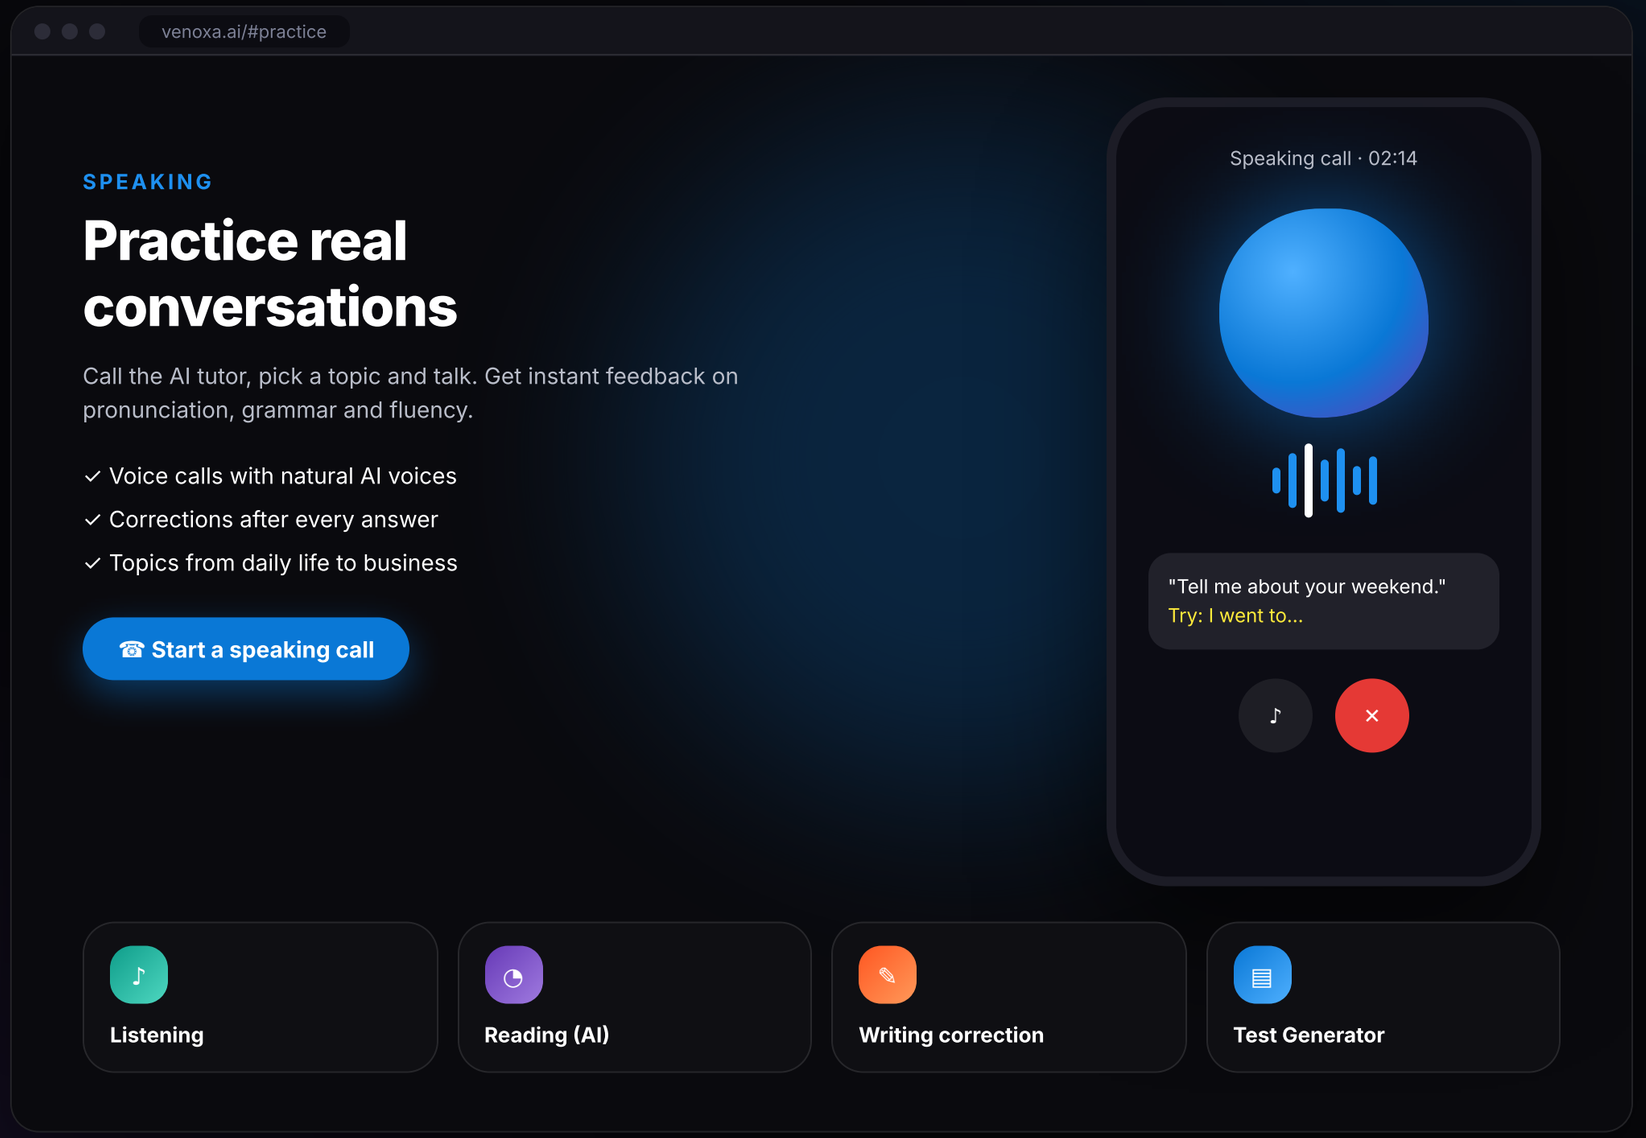

CONTENT

- Tools: Daily Words, Spaced Review, Spelling, Word Lists, Flashcards, Dictionary, Sentence Analyzer.

Targets: `vocab`, `phrasal`, `idioms`, `langeek`, `sentence-diagrammer`.

07 · SPEAKING AND AI PRACTICE

Talk to the AI, then practice every skill

LAYOUT

- Split section: text and CTA on the left, a phone mockup of the call screen on the right (your animated blob with sound-wave bars).
- A row of four small cards underneath: Listening, Reading, Writing, Test Generator.

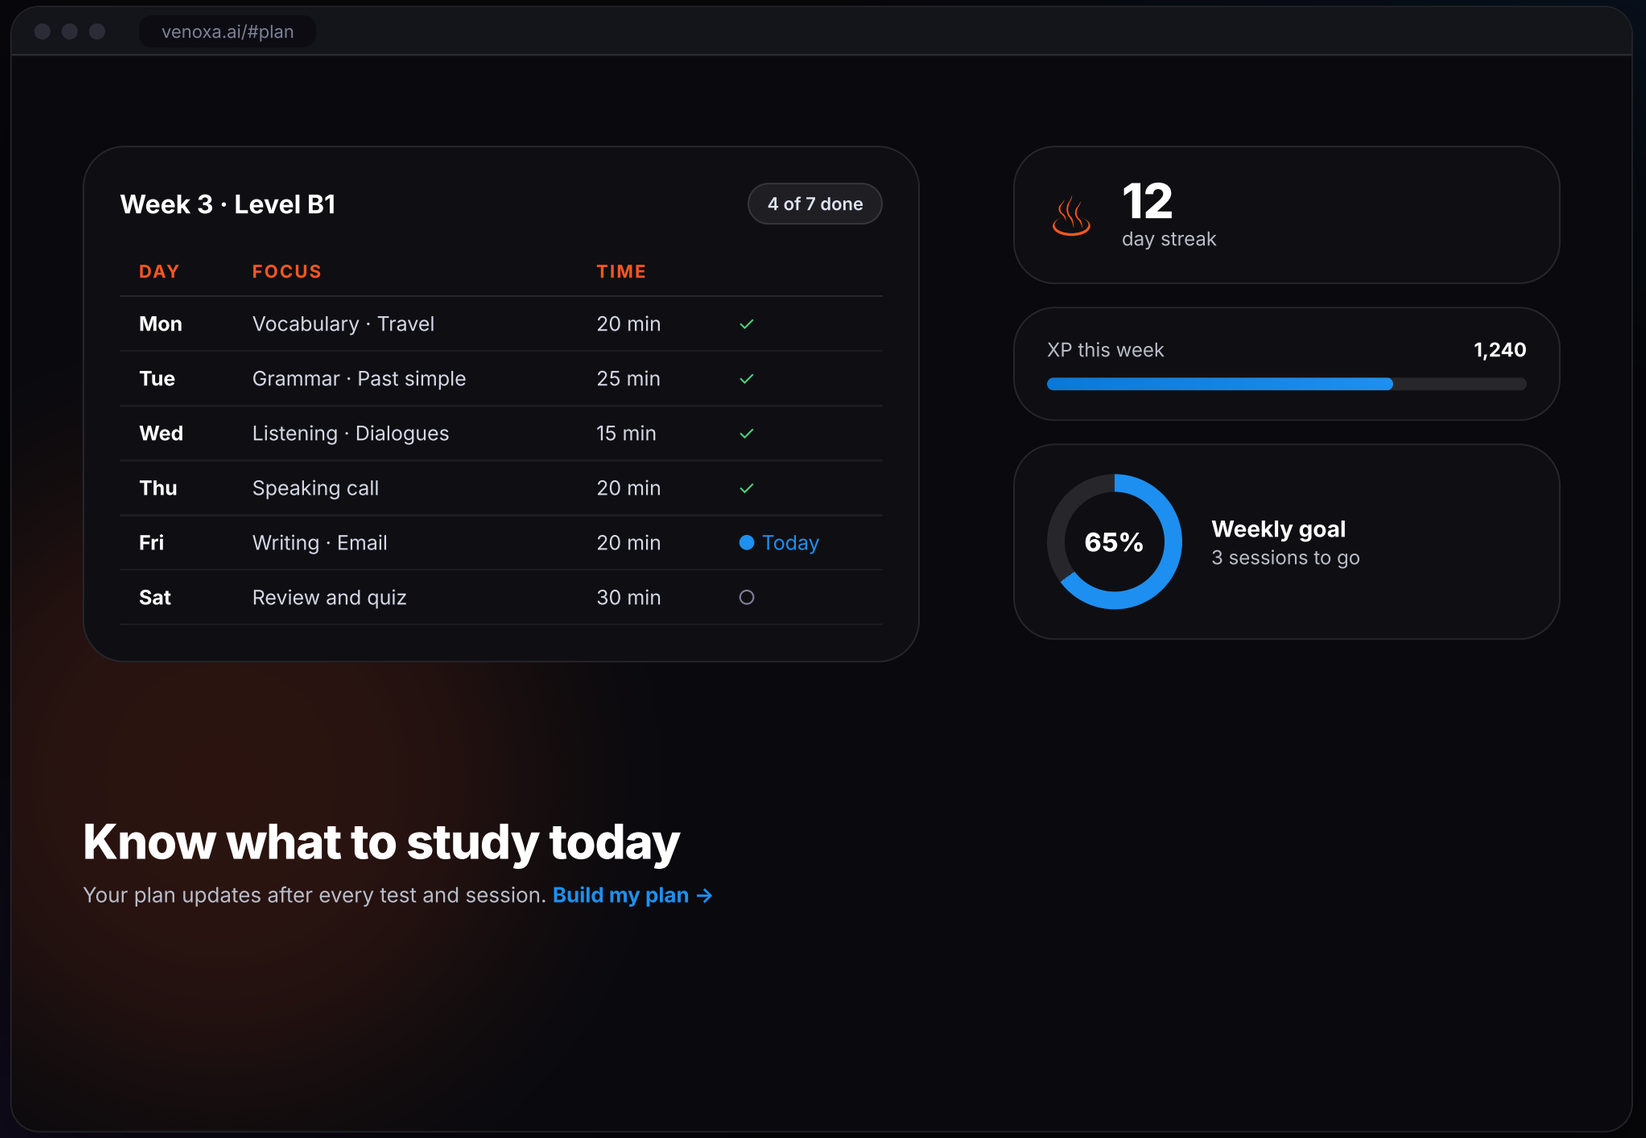

BEHAVIOR

- The blob breathes continuously and the bars react as if someone is talking, so this is the most "alive" part of the page.
- The phone floats up on scroll with a slight parallax; cards stagger in.

Reuses the existing call blob animations (`blob-idle`, `blob-speak`). Targets: `speaking`, `listening`, `reading`, `writing`, `test-gen`.

08 · STUDY PLAN AND PROGRESS

A plan built around your level, with progress you can see

Know what to study today

Your plan updates after every test and session. **Build my plan →**

LAYOUT

- Mirror of the previous section: the visual comes first, copy underneath. A weekly plan card on the left, three stat widgets on the right (streak, XP, goal ring).

BEHAVIOR

- Rows tick off one by one when the section enters view; today's row pulses blue.
- XP bar and goal ring animate from 0; the streak number counts up and the flame flickers in orange.

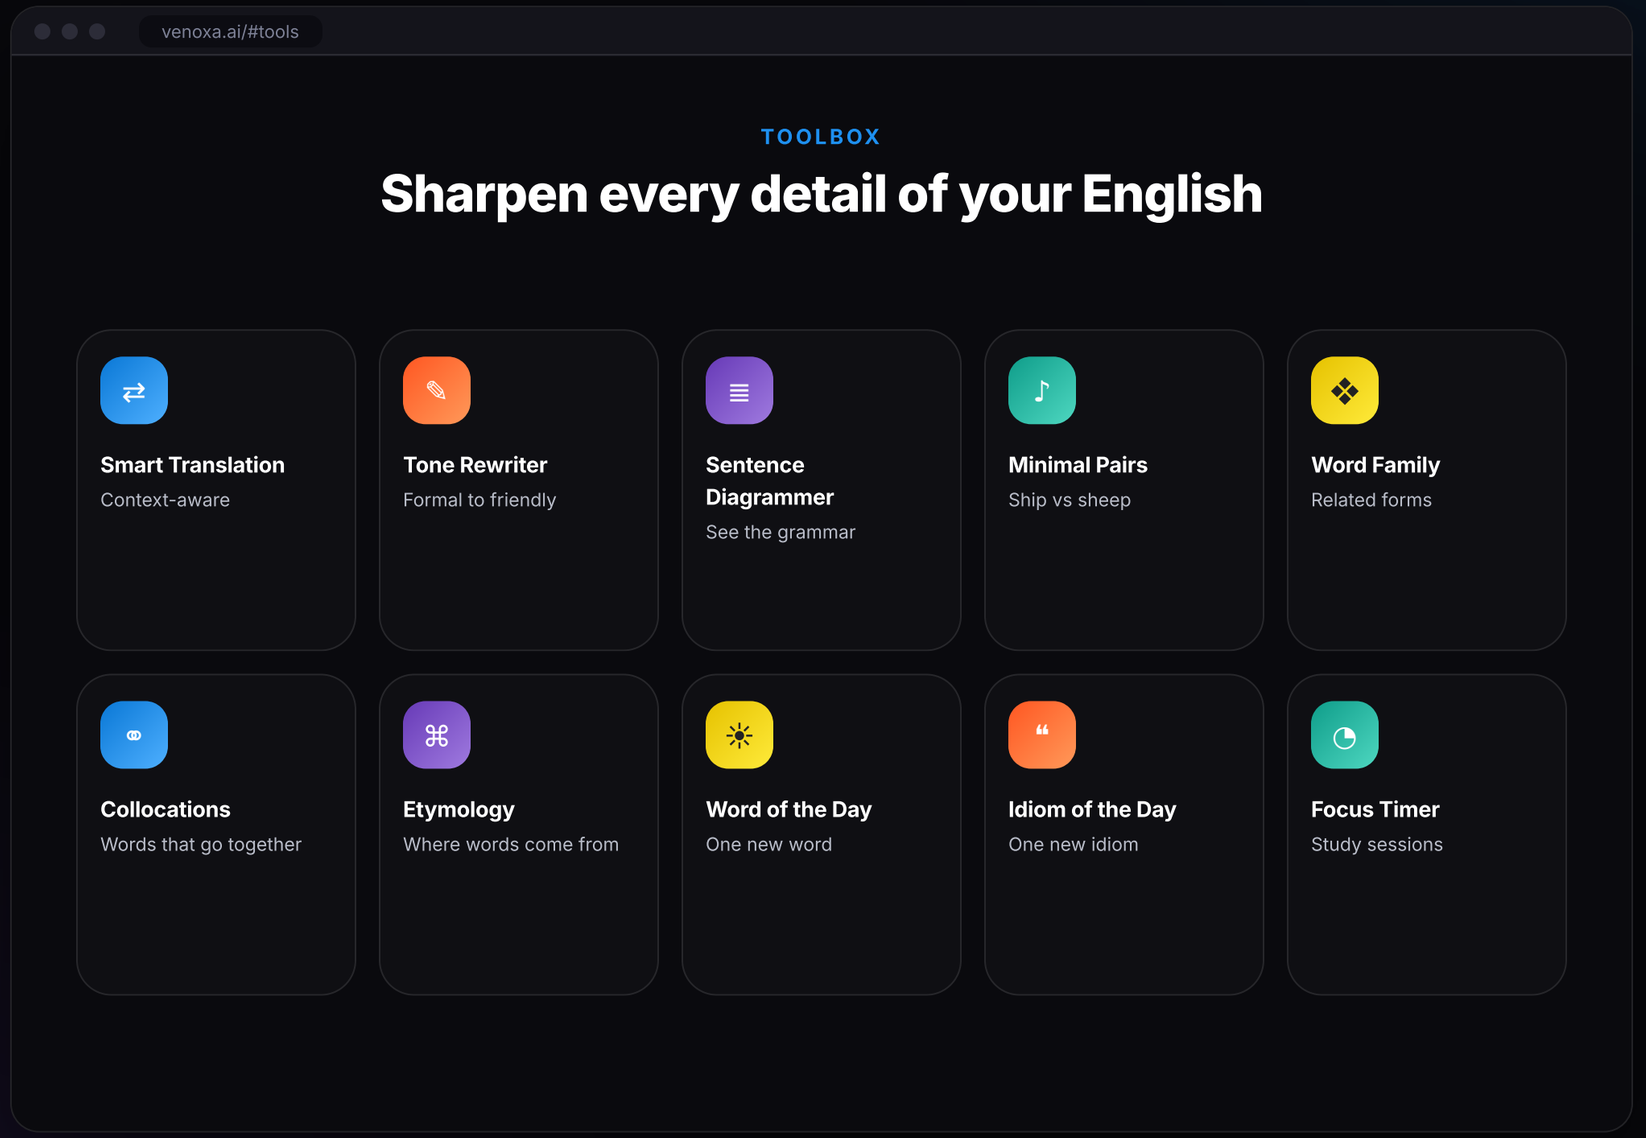

CONTENT

- The sample plan makes the benefit obvious: the learner sees a concrete week, not an abstract promise. The CTA leads into the level test if they have no plan yet.

Mirrors `StudyPlan`, `PlanWeekTable`, `StreakWidget`, `XPWidget`, `GoalWidget`. Targets: `plan`, `profile`.

09 · LANGUAGE TOOLS

A grid of smaller tools, each one click away

LAYOUT

- Ten compact cards in a 5 × 2 grid (2 columns on mobile). Each has a colored icon tile, a title and a one-line description.
- Icon colors rotate through blue, orange, purple, teal, yellow so the grid looks lively without extra illustration.

BEHAVIOR

- Cards ripple in diagonally from the top left.
- Hover: lift, icon wiggle, thin blue border appears.

TOOLS SHOWN

- Smart Translation, Tone Rewriter, Sentence Diagrammer, Minimal Pairs, Word Family, Collocations, Etymology, Word of the Day, Idiom of the Day, Focus Timer.

Targets: `smart-translation`, `tone-rewriter`, `sentence-diagrammer`, `minimal-pairs`, `word-family`, `collocations`, `etymology`, `word-of-day`, `idiom-of-day`, `timer`.

10 · COMMUNITY AND NUMBERS

An orbit of learners, with animated counters

LAYOUT

- Left: heading, short text, "Join now". Right: concentric dashed orbits around a Venoxa badge with six avatar tiles. Four stat cards sit below.

BEHAVIOR

- Avatars orbit very slowly (60s per turn), counter-rotating so faces stay upright.
- Stats count up when they enter the viewport.

IMPORTANT

- The numbers shown here are placeholders. Replace them with real figures from your database, or remove the stat row until you have them.

"Join now" opens `AuthModal` in register mode.

11 · MOBILE APP AND WORD OF THE DAY

Two lighter sections before the final push

MOBILE APP

Download the mobile app

Review words on the bus, practice before bed. Your progress syncs everywhere.

Download the app | Scan QR

☀ Word of the day

resilient

/rɪˈzɪliənt/ · adjective · ▶ listen

"She stayed resilient after losing her job."

DICTIONARY

A picture dictionary that talks

Look up any word with meanings, examples, audio and images.

Open dictionary

MOBILE APP

- Heading, one line of text, download button and QR option; two overlapping phones tilted in opposite directions.
- Phones drift up at different speeds as you scroll.

WORD OF THE DAY / DICTIONARY

- A warm yellow-tinted card shows today's word with audio, so a first-time visitor can hear something right away.
- Beside it, a short pitch for the dictionary with one button.

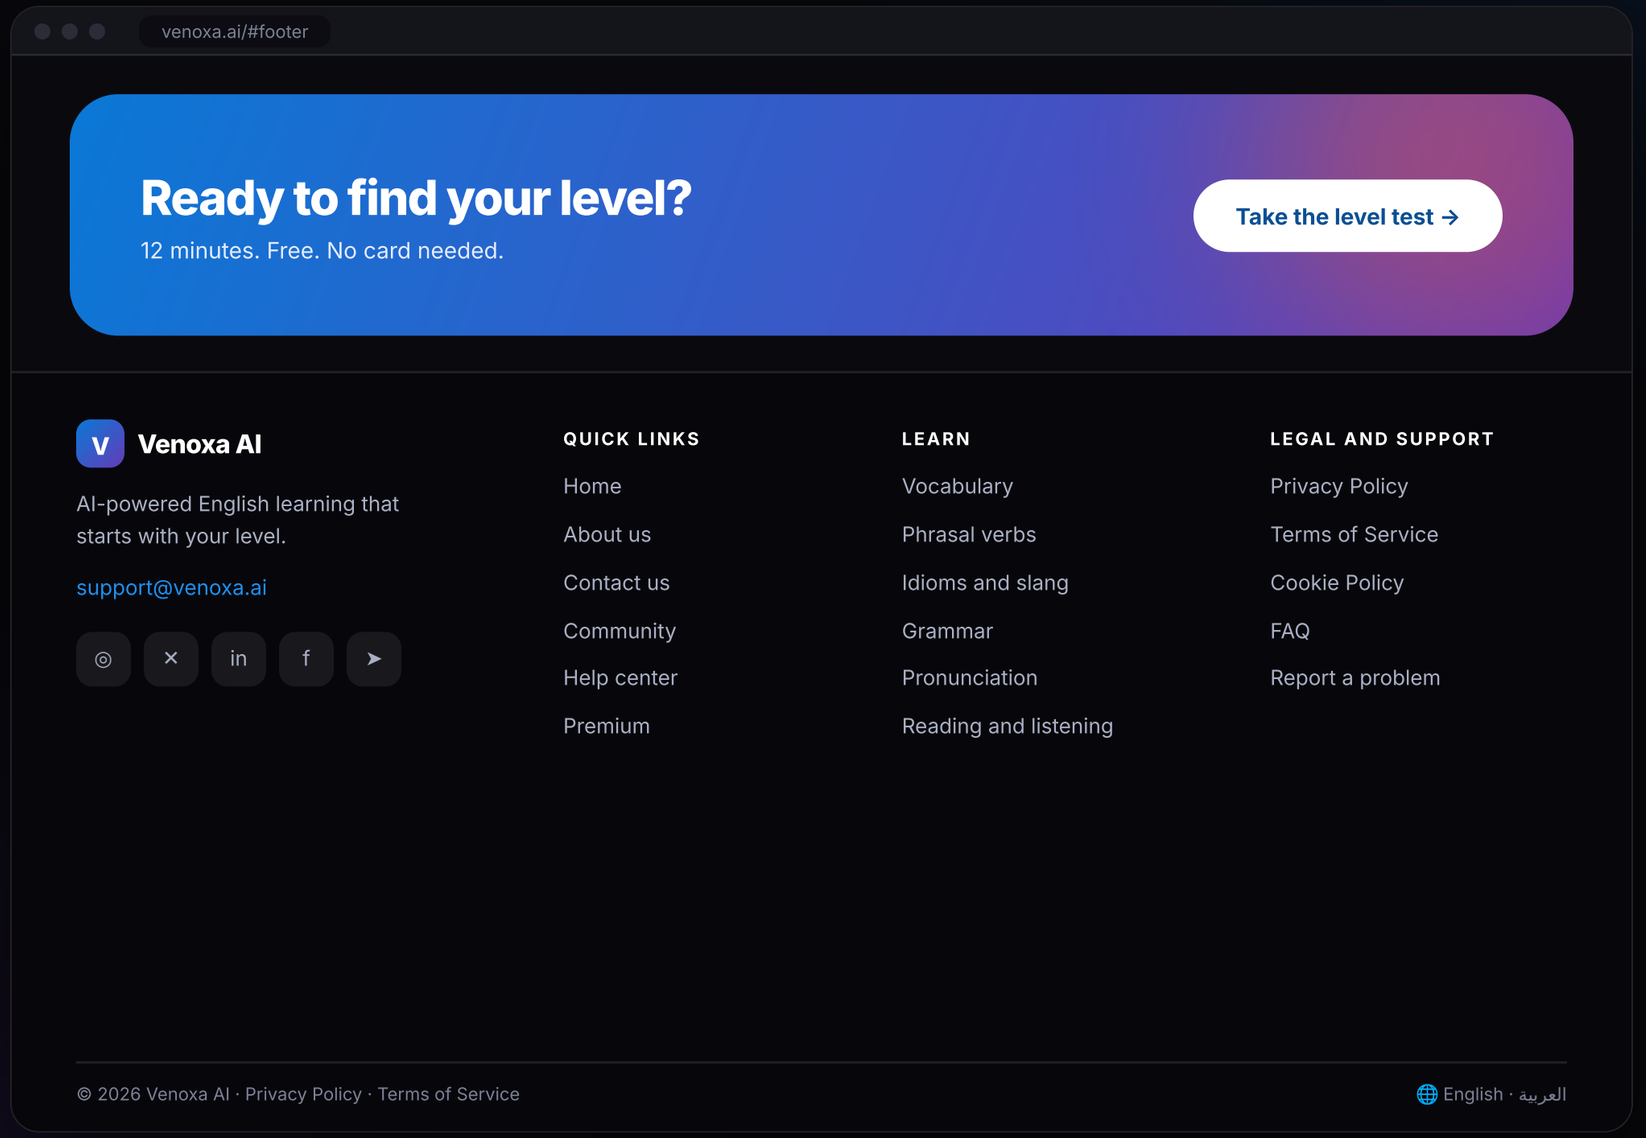

NOTES

- If the mobile app is not released, swap the first section for "Install as an app (PWA)" and keep the layout.

Word card reads from `WordOfTheDay`. Targets: `word-of-day`, `vocab`.

12 · FINAL CALL TO ACTION · 13 · FOOTER

Close with the test again, then a full footer

FINAL CALL TO ACTION

- A compact gradient band repeats the one action that matters: take the level test. White button on blue/purple for maximum contrast.

FOOTER

- **Brand column:** logo, tagline, contact email, five social icons.
- **Quick links:** Home, About, Contact, Community, Help center, Premium.
- **Learn:** main topics with "See more" links.
- **Legal and support:** Privacy Policy, Terms of Service, Cookie Policy, FAQ, Report a problem.
- **Bottom bar:** copyright, legal links repeated, language switch.

BEHAVIOR

- Footer fades up at the end of the scroll; links get a blue underline that grows from the center.

New pages needed: Privacy Policy, Terms, Contact, About, FAQ. The footer is also shown under the logged-in dashboard.

ADAPTATION

Mobile layout and Arabic (RTL) mirroring

BREAKPOINTS

WIDTH	BEHAVIOR
1280+	Full layout, two-column splits, 5-card rows
768-1279	Cards wrap to 3 + 2; splits keep two columns with smaller visuals
< 768	Single column, hamburger drawer, card rows become swipe carousels, stepper turns vertical, the primary CTA is full width

RTL (ARABIC)

- The whole layout mirrors: logo to the right, text right-aligned, arrows point left, progress bars fill from the right.
- All slide and parallax directions flip with the language (multiply x by -1 when `lang === 'ar'`).
- Arabic uses a larger line height (1.5 to 1.6) and no letter-spacing; the numerals can stay Latin or switch to Arabic-Indic per your current choice.
- Orbit rotation and the stepper line direction also reverse.

TOUCH

- Hover effects become tap effects (press scale 0.97); parallax and cursor effects are disabled on touch.

MOTION

How the page comes alive

ELEMENT	MOTION	TIMING
Header	Slides down 16px and fades; nav links stagger left to right	400ms, 60ms stagger
Nav pill	Glides between links (shared layout spring)	spring, 350ms
Hero	Headline lines rise; test card scales in; glows drift	600ms, 12s loop
Sections	Fade up 24px once when 15% visible; children stagger	500ms, 70ms stagger
Path line	Fills with scroll progress, step numbers pop	scroll-linked
Cards	Hover lift 6px, blue glow, icon tilt -6deg	250ms, spring
Buttons	Hover lift 1px and glow; press scale 0.97; sheen on primary CTAs	180ms
Counters	Count up when visible	1.2s ease-out
Call blob	Breathing shape and reactive sound bars	8s loop
Orbit	Avatars rotate slowly with upright counter-rotation	60s linear
Tab change	Exit fade 150ms, enter fade up 350ms	wait mode

PRINCIPLES

- One easing language: `cubic-bezier(0.16, 1, 0.3, 1)` for entrances, a spring for hovers.
- Only transform and opacity animate (plus glow shadows on hover), so scrolling stays smooth.
- Every reveal plays once; nothing re-triggers while scrolling back up.

ACCESSIBILITY AND PERFORMANCE

- `prefers-reduced-motion` turns off loops, parallax, orbit and counters; sections simply fade.
- The particle canvas pauses when the tab is hidden.
- No motion on the speaking call screen except its own blob.

TOOLS

- framer-motion (already in your package.json) for reveals, layout pill and page transitions; CSS for hover states and loops.

IMPLEMENTATION

How each section connects to your existing app

SECTION	USES (EXISTING)	NEW WORK
Header	`navItems`, theme and language state	Utility bar, sliding pill, scroll collapse
Hero + test	`LevelTest`, `setTab('level-test')`	Sample question card, hero layout
Learning path	Level test and plan state	Stepper component with progress
Topic cards	Tab ids, `DashboardCard` style	Illustrations, dot pattern
Premium	Premium flag in user data	Banner, pricing page
Vocabulary	`Vocabulary`, SRS data	Tool list and preview switcher
Speaking	Call blob CSS, `Speaking`	Phone mockup wrapper
Plan + stats	`StudyPlan`, widgets	Static sample week for visitors
Tools grid	10 tool tabs	Grid component
Community	`AuthModal`	Orbit graphic; real stats endpoint
Mobile + word	`WordOfTheDay`	Phone mockups
Footer + legal	Language switch	Footer, Privacy, Terms, Contact, About, FAQ pages

SUGGESTED BUILD ORDER

- 1. Design tokens (colors, radii, easing) in `index.css`.
- 2. New header and footer components.
- 3. `Landing.jsx` with sections 2 to 12 as separate components, each wrapped in a shared `Reveal` component.
- 4. Route logic: logged out shows Landing, logged in shows Dashboard.
- 5. Legal pages (privacy, terms, contact).
- 6. RTL pass and reduced-motion pass.

BEFORE LAUNCH

- Replace placeholder statistics and Premium benefits with real ones.
- Write the Privacy Policy and Terms with a lawyer or a trusted template; the footer links only work once these pages exist.
- Create original illustrations; do not reuse LanGeek artwork.

You can send this PDF to Antigravity or Shuffle together with your `App.jsx`; each page maps one section to a component.
